Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1,3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jp 653' in view of UK 980.

Claims are unpatentable for the same reasons set forth in the previous office action.

Claims 4-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jp 653' in view of UK 980' as set forth above, further taken with either Thivet or UK 698'. Jp 653' as modified teaches the claimed subject matter except for showing the fuse device secured to the outer sheath of the heating device. Note that in both Thivet means 19 is

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1,3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jp 653' in view of UK 980.

Claims are unpatentable for the same reasons set forth in the previous office action.

Claims 4-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jp 653' in view of UJ 980' as set forth above, further taken with either Thivet or Uk 698'. Jp as modified teaches the claimed subject matter except for showing the fuse device secured to the outer sheath of the heating device. Note that in both Thivet means 19 is

secured to the external portion of the heating device and in Uk 698 the heating fuse device is secured to the outer portion of heater 4. In view of these teachings it would have been obvious to modify the Jp device further to include an externally mounted fuse device ;since such coupling would effect more

flexibility to the maker of the device and encompass a wider range of design features.

Response to Amendment

Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection. Applicant's attention is directed to the Uk 890 patent which sets forth a material surrounding the fuse and both the silicone material and the oxide material have a heat

moment the heater is exposed to air, the power is cut off, clearly teaching applicants inventive concept.
